

SCIENCE CASTLE Judging Criteria

1. Issues:

- Clarify the issues to solve with the research
- New issues people never challenged
- New questions people did not find the answer yet

2. Passion on the project:

- The representatives must show their interest on their project
- The topic of the research is interesting enough to attract judges

3. Following Scientific methods:

- The project must be based on relevant hypothesis (in ideal case, students are the one who came up with original question)
- The result of the project must be summarized and discussed in scientific manner (simple and concise)

4. Discovery / New findings:

- Discovery from the project is clearly described
